

SEARCH GROWTH PROPOSAL

SEO + Google Ads Strategy

Prepared for Nova Care Australia

Southern Sydney search visibility and lead generation

Presented by WPPRO · August 2026

NOVA CARE AUSTRALIA

Proposal Overview

A concise plan to improve local visibility, capture high-intent searches and turn more website visits into enquiries.

01 Executive Summary

03 SEO Audit Findings

05 Keyword & Service Strategy

07 Roadmap

02 Current Search Position

04 Local Search Opportunity

06 Google Ads Strategy

08 Investment & Next Steps

A strong service offering, but local search is under-developed

Nova Care Australia already has the key ingredients to grow online: an established website, multiple NDIS service lines, a referral form and current NDIS registration. The opportunity is to make those assets easier to discover for people actively searching across Southern Sydney.

2028

NDIS registration in force*

The challenge, opportunity & plan

The Challenge

- Current search presentation is largely brand-led rather than location + service-led.
- Important service pages show title, URL and heading inconsistencies.
- Business contact/location details appear inconsistent across public sources.

The Opportunity

- High-intent local searches exist for SIL, support coordination and NDIS providers in the Sutherland/Southern Sydney market.
- Nova has a broad registered service offering that can support multiple search entry points.
- Existing referral and enquiry forms provide a solid conversion base.

The Strategy

- Fix technical and on-page foundations first.
- Build local relevance around genuine service areas and priority services.
- Use Google Ads for immediate demand while SEO compounds over time.

Priority SEO findings

Homepage metadata

Search result title is currently "Nova Care Australia - Nova Care Australia", which does not describe the core service or target location.

URL / page mapping

Several service URLs appear mismatched with page titles or H1s - for example /allied-health-professionals/ resolves to Support Coordination, while /aged-care/ presents an aged-care H1 with a SIL-focused search title.

Local relevance

The visible homepage copy does not strongly target Southern Sydney, St George or Sutherland Shire service intent.

NAP consistency

The homepage shows two different phone-number sequences and the website address differs from the NDIS Commission head-office record. These details should be confirmed and standardised.

Content depth

Core service pages explain NDIS concepts, but most are not structured around location-specific search intent, FAQs, proof points or conversion-focused copy.

Conversion assets

Phone CTAs, enquiry forms and a detailed referral form are already in place and can be strengthened rather than rebuilt.

What's already working

Registered provider

Nova Care Australia is listed by the NDIS Commission as an approved provider, with registration in force until 25 August 2028.

Service breadth

Registered groups include SIL, shared living, support coordination, transport, household tasks, personal activities and community participation.

Lead capture

The site already includes phone CTAs, enquiry forms and a dedicated NDIS referral form.

Existing domain

The website has been live since 2021, giving us an established asset to optimise rather than a brand-new domain.

Bottom line: Nova does not need a complete rebuild to start. The first priority is to clean up search signals, localise the strongest pages and measure enquiries properly.

Southern Sydney is the right search focus

The website currently lists Sydenham, while the current NDIS Commission head-office record lists Sans Souci. Before local SEO begins, WPPRO should confirm the primary customer-facing location and the exact service radius. From there, the campaign can build around Southern Sydney with strong relevance to the Sutherland Shire market.

Important setup task

Standardise the business name, phone, address and service-area information across the website, Google Business Profile, NDIS directories and major citations. Local SEO will be much stronger once the core business data is consistent.

PROPOSED LOCAL STRUCTURE

- 1

Primary location
Confirm NAP and Google Business Profile
- 2

Service-area hub
Southern Sydney / St George
- 3

Priority expansion
Sutherland Shire service pages
- 4

Local proof
Reviews, service coverage, FAQs, trust signals

Preliminary keyword direction

These are strategic themes for the proposal. Final keywords, volumes and priorities should be validated in Google Keyword Planner/Search Console during onboarding.

CORE LOCAL

NDIS provider Sutherland

NDIS provider Southern Sydney

disability support services Sutherland Shire

ACCOMMODATION

supported independent living Sutherland

SIL provider Sutherland

NDIS supported accommodation Sydney

COORDINATION

support coordination Sutherland

NDIS support coordinator Southern Sydney

support coordination Sydney

PARTICIPATION & RESPITE

community access NDIS Sutherland

short term accommodation NDIS Sutherland

respite care NDIS Southern Sydney

The local search field is competitive - but clear

In sample searches for Sutherland-area NDIS services, Google surfaced providers with dedicated local pages and service-specific content. Nova did not appear among the surfaced top results in those samples, which suggests a practical visibility gap to work on.

SEO & Local Search Management

Technical cleanup

- Indexation, sitemap and robots review
- Canonical / redirect checks
- URL and permalink cleanup
- Schema and internal-link improvements

On-page SEO

- Titles and meta descriptions
- Unique H1/H2 structure
- Keyword-aligned copy updates
- Priority service-page optimisation

Local SEO

- Google Business Profile optimisation
- NAP/citation consistency
- Service-area strategy
- Review and trust-signal improvements

Content growth

- Location/service page creation
- FAQ expansion
- Search-led content briefs
- Conversion-focused CTAs

Capture demand now while SEO builds

Google Ads provides immediate visibility for high-intent searches. The recommended approach is a tightly controlled Search campaign focused on the services Nova is actively able to take enquiries for.

- Geo-target genuine service areas only.
- Use exact/phrase-led keyword control plus negatives.
- Track phone calls, form submissions and referral completions.
- Use search-term data to improve SEO priorities.

Recommended campaign structure

SIL / Accommodation

High-intent housing and support searches

Support Coordination

Plan and coordinator searches

Community / Daily Supports

Participation, household and daily-living intent

Brand Defence

Nova Care branded searches and protection

One strategy, two acquisition channels

The practical benefit: Ads tell us which searches generate real enquiries. SEO then turns the strongest themes into long-term organic assets, while better landing pages improve both paid and organic conversion.

First 90 days

MONTH 1

Foundation

- Confirm primary location, service areas and NAP
- Set up/verify GA4, Search Console and conversion tracking
- Technical crawl + indexation review
- Fix highest-priority title/H1/URL issues
- Launch or restructure Google Ads Search campaigns

MONTH 2

Localise

- Optimise homepage and priority service pages
- Google Business Profile improvements
- Internal linking and schema implementation
- Create first priority local/service landing page
- Refine Ads negatives, bids, copy and search terms

MONTH 3

Expand

- Optimise next service-page group
- Build local citations / directory consistency
- Add FAQs, proof points and stronger CTAs
- Publish second local/service content asset
- Review enquiry quality and reallocate budget

Months 4-6: build authority and coverage

1

Service expansion

Add or improve high-value service pages based on real search demand and enquiry quality.

2

Local expansion

Extend genuine service-area coverage into the strongest Southern Sydney / Sutherland themes.

3

Content & FAQs

Publish useful service-led content that answers participant, family and referrer questions.

4

Authority

Strengthen reputable citations, partnerships and link opportunities without spam-based link building.

5

Conversion

Improve forms, call paths, referral flow and landing-page messaging using tracked behaviour.

6

Optimisation

Use Search Console, GA4 and Ads data to continuously reprioritise keywords, pages and budget.

Reporting that focuses on enquiries, not vanity metrics

1

SEO visibility

Search impressions, clicks, priority keyword movement, landing-page growth.

2

Local performance

Google Business Profile actions, local landing-page performance, service-area visibility.

3

Google Ads

Spend, clicks, cost per enquiry, search terms, conversion rate and enquiry quality.

4

Lead outcomes

Tracked calls, forms, referral submissions and - where available -qualified/accepted leads.

Cadence: monthly performance report + review of SEO actions, Google Ads performance, lead quality and next-month priorities.

Recommended Search Growth package

Based on WPPRO’s existing Google Ads package structure, the Growth option is the cleanest fit for the original \$2,000/month target.

RECOMMENDED

Google Ads - Growth package amount	\$900
Google Ads management / package fee	\$350
SEO & Local Search Management	\$750

TOTAL PER MONTH **\$2,000**

incl. GST, matching current WPPRO quote format

SEO \$750 / MONTH INCLUDES

- Technical + on-page optimisation
- Local SEO / GBP / citation work
- Priority service & location pages
- GA4 + Search Console reporting
- Monthly strategy and Google Ads alignment

Package options with SEO added

Option	Ads Amount	Ads Fee	SEO	Monthly Total
Starter	\$300	\$350	\$750	\$1,400
Growth	\$900	\$350	\$750	\$2,000
Pro	\$1,800	\$350	\$750	\$2,900

The Growth package is recommended because it preserves enough paid-search budget for meaningful optimisation while leaving room for an ongoing SEO program within the \$2,000 monthly target.

What happens next

1

Confirm scope

Confirm the customer-facing address/service radius and which services Nova wants to prioritise.

2

Access & measurement

Provide WordPress, Google Ads, GA4/Search Console and Google Business Profile access.

3

Launch audit

WPPRO completes the technical/local audit, keyword validation and tracking setup.

4

Begin growth

SEO changes roll out alongside the Growth Google Ads campaign, with monthly optimisation and reporting.

Recommended engagement: Growth Google Ads + SEO = \$2,000/month

SEO is a compounding channel. Specific rankings or lead volumes cannot be guaranteed; WPPRO guarantees the agreed work, tracking, reporting and ongoing optimisation.
